

INTRO

Hello, I'm Mark Montvai

AUG 1990 - PRESENT

I'm a Product Manager with a background in engineering and design. That mix helps me set direction and make decisions that hold up, while speaking the language of engineers and caring about the details designers care about. Skilled at using data, and deliberate about AI: I use it where it's meaningful. I'm quite bad at curling though, to keep this intro a bit balanced.

EXPERIENCE

Product Manager / Product Designer at TicketSwap

AUG 2021 - PRESENT

Popular fan-to-fan ticket marketplace trusted by 20 million users in 40 countries. Hired as a Product Designer, filled in as an interim Product Manager during spells over multiple years. Officially made the switch to PM in June 2026.

Highlighted projects

- Led the team towards a future proof vision for a data structure which works for every ticket, not just music. Implemented the first project built upon that vision: a calendar for theatre shows. Unsold rates declined by ~54% for those events.
- Integrated LLMs in the Listing Creation flow, automating user steps with historically high drop-off rates. Conversion increased by ~12%.

Lead UX Designer at Woov

OCT 2017 - DEC 2019

Festival app which helped visitors and organisers get the most out of events like Mysteryland and ADE. Lead UX Designer by day, whatever was needed by night.

Developer / Designer at Siteworkers

AUG 2014 - MAY 2017

Small internet web agency. I worked on front-end development and UX/UI design.

EDUCATION

Communication and Media Design at University of Applied Sciences Utrecht

2010 - 2014

For a year I was the treasurer and member of the board for the study association.

Computer Science at Utrecht University

2007 - 2012

LANGUAGES

Dutch / English / Hungarian
